

NORTH

1-3-5 Execution Planner

Two weeks. One clear direction.

NORTH 1-3-5 Execution Planner — Customer-Ready Master v1.0

Founder review draft — not for sale

Private commerce-pilot source. This is the complete editable English master for founder quality review, US Letter/A4 print proofing, accessibility review, policy review, and future delivery configuration. It is not approved for customer download, paid access, or public sale.

Use: A printable and screen-fillable planning system for one two-week direction cycle. The source is intentionally layout-neutral so it can be adapted to US Letter and A4 without changing the wording, field order, or accessibility labels.

Product orientation

What is included in the future customer package

The future English customer package is designed to include one print-ready US Letter PDF, one print-ready A4 PDF, one screen-fillable PDF only after an accessibility review, this editable source in a supported customer format only after a license and delivery decision, the fictional worked example, and a short start guide. No app account, coaching, customer support promise, template platform, or digital delivery is active in this Phase 2D review version.

Before you begin

Choose a two-week period with enough ordinary life in it to make the plan useful. Do not attempt to repair every open loop. Select one outcome that can be moved through a sequence of visible actions. If your circumstances change, the planner is meant to help you reduce the plan, defer work, or pause—not to create a score or judgment.

Important boundary: This planner is a self-guided organizational tool. It is not legal, medical, mental-health, financial, tax, employment, investment, or other professional advice. It does not diagnose, treat, or guarantee an outcome.

Start Here

The 1-3-5 method

The day can be clear without being crowded. Choose **one Big Thing**: the meaningful action that would make the day feel honestly moved forward. Choose **three Medium Tasks**: bounded actions that support the Big Thing or keep essential work moving. Choose **five Small Wins**: small, finishable actions that reduce friction, close loops, or make tomorrow easier.

The method is not a demand to complete nine items. It is a way to see the difference between what matters, what supports it, and what can wait. Some days the Big Thing is a conversation, a decision, a recovery boundary, or a careful first step—not an impressive output.

Use it in under ten minutes

1. Read your two-week intention before selecting today's work.
2. Write a specific Big Thing that has a visible definition of done.
3. Add no more than three Medium Tasks. If one cannot reasonably happen today, move it to the parking line rather than pretending.
4. Add up to five Small Wins. They should be small enough to finish without opening a new project.
5. Reserve one realistic focus block. Protecting 25 honest minutes is more useful than planning three imaginary hours.
6. Name the obstacle most likely to interrupt the day, then choose one response you can actually use.
7. At day's end, mark what happened, write one sentence of evidence, and leave tomorrow a clearer starting point.

What this is / what this is not

This is	This is not
A short self-guided planning and reflection structure	A diagnosis, treatment, performance rating, or productivity guarantee
A way to make one priority visible	A rule that every day must contain nine completed tasks
A record of progress, friction, and adjustment	Professional legal, medical, financial, investment, tax, employment, or other advice
A tool that can stand alone on paper or screen	A requirement to use the NORTH app or share personal information

Gentle rule: If a page becomes evidence that you are behind, stop and make the next page smaller. The planner is meant to reduce noise, not manufacture pressure.

Two-Week Intention

Cycle dates: ____ to ____

One outcome worth carrying for two weeks

At the end of these two weeks, I want to be able to say:

Why this matters now

What will be easier, clearer, safer, or more honest if this outcome moves forward?

Boundaries that make the outcome realistic

I will protect	I will not take on	I may need to ask for / communicate
_____	_____	_____
_____	_____	_____

Evidence I can notice

Choose three signs that show movement without requiring perfection.

1.
-
2.
-
3.
-

Starting point

The first small, visible action is: _____

The day I will begin is: _____

Daily Planning Pages

Layout rule for production: Each daily page is one page in both US Letter and A4 layouts. Keep all field labels visible; allow the notes area to expand in digital form output. Use the same field order every day so keyboard users and print users learn the rhythm.

Day 1 — Make the day smaller than your worry

Date: ____ Energy / focus observation (not a score): ____

One Big Thing

The one action or conversation that would make today honestly move forward:

Definition of done:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

When: ____ For how long: ____

Where / with what boundary: ____

Likely obstacle and response

The interruption I expect: _____

My smallest useful response: _____

Completion check

- ☐ I began the Big Thing.
- ☐ I moved one support task.
- ☐ I noticed what made the day easier or harder.

Evening reflection — one sentence of evidence:

Parking line for tomorrow: _____

Day 2 — Protect the first useful step

Date: _____ Energy / focus observation: _____

One Big Thing

Today's Big Thing: _____

The first physical or digital step I can start without preparation:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. _____ 2. _____ 3. _____

2. _____ 5. _____

Realistic focus block

Start time: _____ End time: _____

What I will put out of reach or postpone: _____

Likely obstacle and response

If I hesitate, I will begin by: _____

Completion check

- ☐ I protected the first useful step.
- ☐ I kept my list smaller than my available time.
- ☐ I left a clear handoff for tomorrow.

Evening reflection: What did I start more easily than expected?

Parking line for tomorrow: _____

Day 3 — Choose the next honest action

Date: _____ Energy / focus observation: _____

One Big Thing

Today's Big Thing: _____

The next honest action—not the whole project—is:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

Block: ____ One proof I used it: ____

Likely obstacle and response

If the task grows, I will reduce it to: ____

Completion check

- ☐ I selected a next action I could see and name.
- ☐ I avoided adding work simply because it appeared.
- ☐ I wrote down one useful fact for tomorrow.

Evening reflection: What became clearer when I worked on the next action?

Parking line for tomorrow: ____

Day 4 — Let support work support the priority

Date: ____ Energy / focus observation: ____

One Big Thing

Today's Big Thing: ____

How this connects to my two-week outcome:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

Block: ____ Support I need before it begins: ____

Likely obstacle and response

A support task that could become avoidance is: ____

I will contain it by: ____

Completion check

- ☐ My Medium Tasks supported the Big Thing or essential maintenance.
- ☐ I noticed one task that did not belong today.
- ☐ I kept a useful record rather than a perfect record.

Evening reflection: Which support task actually helped?

Parking line for tomorrow: ____

Day 5 — Leave room for reality

Date: ____ Energy / focus observation: ____

One Big Thing

Today's Big Thing: ____

The smallest version that still counts:

Three Medium Tasks

1. ____

2. ____

3.

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

Block: ____ Fallback block if the day shifts: ____

Likely obstacle and response

If plans change, I will preserve: ____

Completion check

- ☐ I used a smaller version rather than abandoning the day.
- ☐ I made one decision about what could wait.
- ☐ I recorded reality without judgment.

Evening reflection: What remained possible after the day changed?

Parking line for tomorrow: ____

Week One Reset / Review

Review date: _____

Wins that have evidence

What moved, finished, clarified, or became easier to begin?

1. _____
2. _____
3. _____

Unfinished items

Item	Keep / change / stop / defer	First next action or reason to release it
_____	_____	_____
_____	_____	_____
_____	_____	_____

Friction and energy / focus observation

The pattern that made work harder: _____

The condition that made work easier: _____

What I noticed about my energy or attention, without turning it into a judgment:

Keep / change / stop

Keep: _____

Change: _____

Stop or defer: _____

Next-week choice

The one Big Thing I most want to protect next week is:

Day 6 — Re-enter without restarting from zero

Date: ____ Energy / focus observation: ____

One Big Thing

Today's Big Thing: _____

The evidence from last week I will use instead of starting over:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

Block: ____ Re-entry cue: ____

Likely obstacle and response

If I feel behind, I will read this line: _____

Completion check

- ☐ I used evidence from the first week.
- ☐ I chose re-entry over catching up.

- [] I named a practical next step.

Evening reflection: What did I continue rather than rebuild?

Parking line for tomorrow: _____

Day 7 — Make a decision that protects the work

Date: _____ **Energy / focus observation:** _____

One Big Thing

Today's Big Thing: _____

A decision that would protect this work is:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. _____

2. ____ 5. ____

Realistic focus block

Block: _____ **Decision communicated / recorded where appropriate:** __

Likely obstacle and response

A request or distraction I may need to decline is: _____

Respectful response: _____

Completion check

- ☐ I protected time or attention with one concrete decision.
- ☐ I kept the decision proportionate to the situation.
- ☐ I left the next step visible.

Evening reflection: What boundary helped today?

Parking line for tomorrow: _____

Day 8 — Use the middle of the cycle

Date: _____ **Energy / focus observation:** _____

One Big Thing

Today's Big Thing: _____

What the middle of this two-week cycle is asking me to finish, test, or simplify:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. _____

2. ____ 5. ____

Realistic focus block

Block: _____ **One thing I will not reopen today:** _____

Likely obstacle and response

If I am tempted to redesign instead of finish, I will: _____

Completion check

- ☐ I finished, tested, or simplified one meaningful part.
- ☐ I noticed unnecessary complexity.
- ☐ I created a usable handoff or next action.

Evening reflection: What became simpler?

Parking line for tomorrow: _____

Day 9 — Make the next move visible to another person, if needed

Date: _____ **Energy / focus observation:** _____

One Big Thing

Today's Big Thing: _____

The person, place, or record that needs a clear update is:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

Block: ____ Message / record prepared: ____

Likely obstacle and response

If I over-explain, I will reduce the update to: ____

Completion check

- ☐ I made the next move visible where it needed to be.
- ☐ I kept the update factual and proportionate.
- ☐ I did not confuse communication with completion.

Evening reflection: What changed once the next move was visible?

Parking line for tomorrow: ____

Day 10 — Notice the task beneath the task

Date: ____ Energy / focus observation: ____

One Big Thing

Today's Big Thing: ____

The actual task beneath the noisy version is:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

Block: ____ Tool / document / place I need ready: ____

Likely obstacle and response

If the task remains vague, I will ask: _____

Completion check

- ☐ I named the real work.
- ☐ I prepared one practical condition for it.
- ☐ I left less ambiguity than I found.

Evening reflection: What was the task really asking for?

Parking line for tomorrow: _____

Day 11 — Turn friction into a design note

Date: ____ Energy / focus observation: ____

One Big Thing

Today's Big Thing: _____

The friction I want to observe rather than fight is:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

Block: ____ One small change I will test: ____

Likely obstacle and response

If the change does not help, I will record: ____

Completion check

- ☐ I treated friction as information.
- ☐ I tested one modest adjustment.
- ☐ I captured what I would repeat or avoid.

Evening reflection: What did friction teach me about the setup?

Parking line for tomorrow: ____

Day 12 — Finish a small loop

Date: ____ Energy / focus observation: ____

One Big Thing

Today's Big Thing: ____

One small loop I can close fully today is:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

Block: ____ Closing evidence I will leave: ____

Likely obstacle and response

If I reach the last 10%, I will: _____

Completion check

- ☐ I closed one loop or named why it remains open.
- ☐ I created a record another person—or future me—could understand.
- ☐ I avoided opening an unrelated loop.

Evening reflection: What did a finished small loop make possible?

Parking line for tomorrow: _____

Day 13 — Prepare a humane handoff to yourself

Date: ____ Energy / focus observation: ____

One Big Thing

Today's Big Thing: _____

What I want tomorrow's self to know immediately:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

Block: ____ Handoff note location: ____

Likely obstacle and response

If I run out of time, I will finish by writing: ____

Completion check

- ☐ I prepared a humane, specific handoff.
- ☐ I left tools or documents in a useful state.
- ☐ I chose the next step before I needed it.

Evening reflection: What will make re-entry easier?

Parking line for tomorrow: ____

Day 14 — End the cycle with evidence, not a verdict

Date: ____ Energy / focus observation: ____

One Big Thing

Today's Big Thing: ____

The evidence I want to gather before the final review:

Three Medium Tasks

1. _____

2. _____

3. _____

Five Small Wins

1. ____ 2. ____ 3. ____

2. ____ 5. ____

Realistic focus block

Block: ____ Final review appointment: ____

Likely obstacle and response

If I turn the review into a verdict, I will return to: ____

Completion check

- ☐ I gathered evidence from the cycle.
- ☐ I noted what belongs in the next cycle and what does not.
- ☐ I ended with a clear next choice.

Evening reflection: What is true now that was not clear two weeks ago?

Parking line for the final review: _____

Week Two Reset / Review

Review date: _____

Wins with evidence

1. _____
2. _____
3. _____

Unfinished items

Item	Is it still meaningful?	Keep / change / stop / defer	First next action
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

Friction, energy, and focus observation

The condition I would design differently next cycle:

The condition I would protect again:

Keep / change / stop

Keep: _____

Change: _____

Stop or defer: _____

Next-cycle choice

My next two-week outcome, or my decision to pause, is:

Final Two-Week Review and Continuation Plan

Look at the whole cycle

The Big Things I actually moved were:

The Medium Tasks that proved useful were:

The Small Wins that reduced the most friction were:

Continue with intention

I will continue	I will change	I will leave behind
_____	_____	_____
_____	_____	_____

My next starting point

Date / cue: _____

One next Big Thing: _____

One support condition I will prepare first: _____

Fictional Worked Example — Jordan's two-week documentation reset

This is a fictional workflow example. It does not describe a real person and is not employment, legal, medical, financial, investment, tax, or professional advice.

Jordan coordinates a small internal operations team. Several process notes are scattered across messages and old files. Jordan's two-week outcome is not "fix every process." It is: **Create one clear intake guide for recurring requests, test it with one teammate, and note what needs changing.**

Boundaries: Jordan will not redesign the entire system, introduce a new software platform, or turn this into an after-hours project. A 45-minute focus block is protected on Tuesday and Thursday mornings.

Sample day

Big Thing: Draft the first version of the intake guide's "What to include" section.

Definition of done: A one-page draft exists in the team's shared folder with five requested fields and a short example.

Medium Tasks:

1. Review three recent request examples and list recurring missing details.
2. Ask one teammate which field they most often need to chase.
3. Add the guide link to the working notes.

Small Wins: Rename the draft clearly; close two old request tabs; write the test date on the calendar; put the shared-folder link in the notes; add a parking-line question about approvals.

Likely obstacle: Jordan may begin comparing every old request instead of drafting. **Smallest response:** Review only three examples, then begin the field list.

Evening evidence: "The guide now has five fields and a small example. One teammate said the 'needed-by date' field will help."

Sample weekly review

Keep: the Tuesday/Thursday focus block and the one-page limit.

Change: ask for feedback earlier rather than waiting for the guide to feel complete.

Stop: reopening old folders for "just one more example."

Next-week choice: run one real request through the guide and record the unclear field.

Product-use and accessibility notes

US Letter and A4 layout review checklist

- ☐ The Start Here section begins on a new page in both layouts.
- ☐ The Two-Week Intention page does not split a field label from its writing area.
- ☐ Each of the fourteen daily pages begins and ends on one page in US Letter and A4 versions.
- ☐ The two reset pages and final review each begin on a new page.
- ☐ Body copy is no smaller than 10.5 pt in print output; labels are no smaller than 9 pt.
- ☐ Contrast is print-safe: deep navy text on off-white / white paper; warm gold is never the only instructional signal.
- ☐ Form fields, if implemented, have visible labels; placeholders alone are not labels.
- ☐ Keyboard order follows the visible page order: date → Big Thing → definition → Medium Tasks → Small Wins → focus block → obstacle → completion → reflection → parking line.
- ☐ Headings use a single logical hierarchy and descriptive section titles.
- ☐ A real PDF/AcroForm implementation, tagged-PDF check, assistive-technology test, and printer proof remain future release blockers.

Private founder-review edition. Customer delivery, payment, checkout, pricing, download, email, and public release remain disabled.
